Executive Summary Template on Monuments Review.docx

Hello all-

We are well on our way to compiling responses for the Department's data call related to the recent Executive Order on the Review of Designations Under the Antiquities Act.

Notes on each requested document are located in the "Initial Data Request Related to Review of National Monuments" Google document, which can be edited directly by Tyler, Don, Cindy, Matt or myself. A Word version is attached for those without Google Drive access. Most of the low-hanging fruit (the Proclamations, Management Plans, etc.).

We need assistance from Kent's staff to pull data for ROWs, oil and gas, coal and mineral production for both BENM and GSENM. Alan and Josh are assisting with BENM grazing data. Nate and Ashley are assisting with cultural information.

Please do not create any new data. Upload the best data currently available and explain any caveats (e.g., if we only have data for the entire MtFO and cannot parse out BENM, then note as such). Our understanding is that DOI Economists will be reviewing and analyzing this data after our initial due date of this Wednesday. There is a high potential for follow-up calls.

Tyler is POC for BENM. UTSO has most of the data requested and will require minimal input from staff. Please send any requested information to him, with a CC: to me and Don Hoffheins. Cindy is coordinating efforts from GSENM, with assistance needed from Kent's staff. I will work with Jabe to ensure that recreation data is captured consistently with our reporting for BENM.

I will draft the requested Executive Summary (also in the Drive folder- template attached) and route through GSENM, BENM and External Affairs for review no later than noon tomorrow. This will give managers and External Affairs a day and a half to review and edit.

Please plan to call in on Wednesday morning at 8:30 am to review any remaining data needs. Calendar invite to follow. Call me with any questions. Thanks!

Matt Z

Nate & Ashley are pulling the info for Bears Ears. Check with them but for GSENM we need the

# of sites inventoried, the % of the monument inventoried and a statement that indicates the cultural importance to the tribes...all acres?

They discussed a site density map as well. Talk to Nate and see if they have one or if we can use the one we came up with recently.

Hello all-

We are well on our way to compiling responses for the Department's data call related to the recent Executive Order on the Review of Designations Under the Antiquities Act.

Notes on each requested document are located in the "Initial Data Request Related to Review of National Monuments" Google document, which can be edited directly by Tyler, Don, Cindy, Matt or myself. A Word version is attached for those without Google Drive access. Most of the low-hanging fruit (the Proclamations, Management Plans, etc.).

We need assistance from Kent's staff to pull data for ROWs, oil and gas, coal and mineral production for both BENM and GSENM. Alan and Josh are assisting with BENM grazing data. Nate and Ashley are assisting with cultural information.

Please do not create any new data. Upload the best data currently available and explain any caveats (e.g., if we only have data for the entire MtFO and cannot parse out BENM, then note as such). Our understanding is that DOI Economists will be reviewing and analyzing this data after our initial due date of this Wednesday. There is a high potential for follow-up calls.

Tyler is POC for BENM. UTSO has most of the data requested and will require minimal input from staff. Please send any requested information to him, with a CC: to me and Don Hoffheins. Cindy is coordinating efforts from GSENM, with assistance needed from Kent's staff. I will work with Jabe to ensure that recreation data is captured consistently with our reporting for BENM.

I will draft the requested Executive Summary (also in the Drive folder- template attached) and route through GSENM, BENM and External Affairs for review no later than noon tomorrow. This will give managers and External Affairs a day and a half to review and edit.

Please plan to call in on Wednesday morning at 8:30 am to review any remaining data needs. Calendar invite to follow. Call me with any questions. Thanks!

Subject: Re: Department of Interior Data Call for BENM and GSENM (DD: Wed. at COB)  
To: "Ginn, Allison" <[aginn@blm.gov](mailto:aginn@blm.gov)>  
Cc: Kent Hoffman <[khoffman@blm.gov](mailto:khoffman@blm.gov)>, Roger Bankert <[rbankert@blm.gov](mailto:rbankert@blm.gov)>, Stan Perkes <[sperkes@blm.gov](mailto:sperkes@blm.gov)>, Sheri Wysong <[swysong@blm.gov](mailto:swysong@blm.gov)>

Recommendation:

- 600+ exploration drill holes were completed prior to the GSENM designation to define the coal geology for planning the underground mines. -- *attached source is: "BLM 1996-1997 Kaiparowits Coal Report - DRAFT" ..... "Table 1 shows the average quality for Kaiparowits Plateau summarized from 637 analyses taken from drill hole cores from coal lands within the Monument." (attached -- it was not finalized)*
- A regional analysis/FEIS for mining was completed in 1979
- 64 coal leases (~168,000 acres) were issued for the planned mines ---- *source is from LR2000, Opie is running it again*
- 

*We located a copy of the Smoky Hollow DEIS in Kanab. They scanned the cover and title page (attached) first so that can be attached. They will complete a full scan.*

*Please note -- The drill hole count is based on holes where drill core was recovered and analyzed and not just a record of coal thickness.*

*So there are probably many more drill holes, but 600+ is a reasonably confirmed number.*

On Wed, May 17, 2017 at 12:08 PM, Ginn, Allison <[aginn@blm.gov](mailto:aginn@blm.gov)> wrote:

I can make that edit or we can say 700+- your call. Can you confirm the following information:

- i. No coal was produced from the GSENM in the five years preceding designation. However, exploration activities and planning for mining operations continued from the 1980's until the monument designation.
  - A regional analysis/FEIS for mining was completed in 1979, noting that 64 coal leases (~168,000 acres) were committed (3.b.FINAL EIS - Dev of Coal Resources in Southern Utah.pdf)
  - A major coal mine (Andalex Resources' Smoky Hollow Mine) was planned in the mid-1990's and an EIS was initiated.
  - 700+ exploration drill holes were completed prior to GSENM designation to determine the thickness of coal underground.

The problem is the GSENM does not cover all of the coal areas so a total count within the GSENM .

This report (quoting BLM) indicates over 1,000 company holes not including the USGS holes etc...

Attached: "USGS Kaiparowits Coal Resource Report (USGS, OFR 96-539)"

Inline image 1

Stan (who is in the field) found there were 722 exploration holes so we estimated 720.

Perhaps the best thing will be to say: "many hundreds of exploration drill holes have been completed"?
